LIBRARY OF CONGRESS INFORMATION BULLETIN

Vol. 35, No. 53 December 31, 1976

BEGINNINGS CATALOG GOES ON SALE

A catalog entitled *Beginnings* to accompany the exhibition by the same name now located in the Library's Great Hall is for sale for $1 at the Information Counter. The handsome 32-page, softcover booklet contains several illustrations of the 35 treasures in the exhibit. ["Beginnings" was described in the LC *Information Bulletin* for November 19, pp. 703-708.]

The exhibit, which records the quest for new frontiers—geographical and intellectual, is divided into seven parts: A New Concept of the Universe, A New Part of the World, New Technologies, New Ideas, New Paths in the Arts, A New Expansion of Public Library Service, and New Scholarship. Items included in the display are Copernicus' *De revolutionibus* . . . published in 1543, the telegram of December 17, 1903 announcing Wilbur and Orville Wright's first successful powered flight, and letters from Sigmund Freud to Carl Jung detailing Freud's exploration of the mind, ushering in the modern wave of psychoanalysis.

Orders for the catalog *Beginnings* should be directed to the Information Office, Library of Congress, Washington, D.C. 20540. All orders must be prepaid.

The Information Office also has for sale, either by mail or in person, the poster designed to accompany "Beginnings." The poster bears the same design that is used on the cover of the exhibit catalog, which was adapted from an engraving by Theodor de Bry found in Thomas Hariot's *A Briefe and True Report of the New Found Land of Virginia.* The handsome brown-and-buff poster measures 24 inches wide by 32 inches tall; it sells for $2.50.

FCU DECLARES DIVIDEND

The Board of Directors of the Library of Congress Federal Credit Union declared a 6 1/4 percent dividend (5 3/4 percent regular and 1/2 percent special) for share accounts on deposit during the quarter ending December 31. Interest, totaling over $40,000, will be posted to members' accounts on January 1, 1977.

SHARKS SUBJECT OF EXHIBIT

Sharks, the peerless predators of the seas, will be examined in an exhibition which opens at the Library of Congress on January 3. "Sharks: The Marvelous Marauders" will survey the causes of shark attacks on man, the nature and types of research being conducted on shark physiology and behavior, and the commercial uses of the fish.

On display will be photographs, journal articles, and books from the Library's collections and actual specimens, including the jaws of a blue shark and an enormous four-million-year-old fossil tooth from a

75-foot shark, on loan from the Smithsonian Institution.

Described as "a swimming, eating, and reproducing machine without peer," the shark is considered an evolutionary success story, having changed little in over 60 million years. As the exhibit illustrates, sharks are models of efficiency with their boneless skeletons, simple brains and generalized nervous systems, and simple internal structures. Their hydrodynamically designed shapes, razor-sharp replaceable teeth and powerful jaws, and voracious appetites make them excellent marauders. Their well-developed sensory systems enable them to detect extreme dilutions of blood in water, low frequency sounds of splashing made by fish in distress, and movements and contrasts in water.

While many sharks are caught by fisherman for sport, sharks can and do sustain small commercial ventures. As the exhibit shows, their skin provides a hide tougher than leather out of which boots and wallets are fabricated and their enormous livers contain a valuable source of natural vitamin A. Shark meat is processed for fertilizer and livestock feed as well as for public consumption. The British "fish-and-chips" industry depends on shark meat; the Italians annually consume about 10 million pounds of "palombo," the smooth dogfish shark; and the Chinese use shark fins for soup, a well-known delicacy. Generally, however, shark meat is consumed unknowingly in many countries under other, more palatable names. Sharks, which are virtually immune to cancer, are also contributing to medical research through studies of their immunological properties and systems. They perform a valuable service in maintaining the ecological balance of the oceans by scavenging on dead and dying fish and by weeding out weak species.

The exhibit also deals with attacks on human beings by sharks, which maim or kill 25 to 30 people every year worldwide. In their encounters with man, sharks behave unpredictably—at times they attack from a hunger instinct, attempting to consume their victims, and other times they do not feed but aggressively maul their victims. Sharks have also been known to flee from a man in the water. As the exhibit shows, little is known about this aspect of shark behavior.

"Sharks: The Marvelous Marauders" will be on display through April 30 in the Fifth Floor foyer of the Thomas Jefferson Building.

ULANE BONNEL HONORED

Ulane Bonnel, the Library's *déléguée* in Paris, has been honored by France which has named her a Chevalier of its Order of Arts and Letters. She and Ted Tanen, deputy public affairs officer and cultural affairs attaché of the U.S. Embassy in Paris, were decorated on November 23, by Monsieur Jean Favier, director general of the Archives of France. The ceremony took place in the George Washington Salon of the France-Amérique mansion during a reception given by Admiral and Mrs. Bonnel and Mr. and Mrs. Tanen.

Authors of the *Guide des sources de l'histoire des Etas-Unis dans les archives françaises,* the *Guide's* publisher and members of his staff, specialists of American studies in France, embassy officials, directors of libraries, archival institutions, and museums in Paris, representatives of the ministries of Foreign Affairs, of Education and Cultural Affairs, and other distinguished guests gathered to witness the ceremony and to hear Mr. Favier's brilliant and stimulating remarks on the frontier-less realm of cultural heritage. National patrimony, he declared, can take on its full meaning only when it is shared.

Mr. Favier and Mrs. Bonnel

No one, he said, who has watched crowds of Americans visit, in awe-struck respect, the museum of the Cloisters in New York City, or the cathedrals of Chartres, Vezelay, or Paris, can question the necessity, indeed the rightness, of sharing the splendors of those architectural marvels with others. So it is with the sources of history, the raw material for the study of human experience. In that respect, the long record of fruitful collaboration between French and American institutions and scholars is exemplary, Mr. Favier stated, as is attested by its most recent contribution to the field: the *Guide*. Mr. Favier then complimented Mrs. Bonnel for her decisive role in initiating and pursuing the project to completion and Mr. Tanen for the encouragement and support which he unfailingly provided.

In their replies, Mrs. Bonnel and Mr. Tanen expressed their deep appreciation of the honor bestowed upon them and their gratitude to all who gave so willingly and so generously of their time and their competence to produce this greatly needed *Guide* during the Bicentennial year.

[A reference note on the *Guide des sources de l'histoire des Etats-Unis dans les archives françaises* appeared in the LC *Information Bulletin* of November 12, pp. 698-99.]

SMALL'S *HANDBOOK* REPRINTED

Not long after the Library of Congress Building was completed and opened to the public in 1897, Herbert Small compiled a detailed handbook on the architectural features of the new building. A *Handbook of the New Library of Congress*, published in Boston in 1901 by Curtis & Cameron, describes in 102 pages crammed full of information and illustrations every aspect of the splendid new building capped by a gold-leaf dome.

Once again, thanks to the efforts of the Library of Congress Professional Association, Small's *Handbook* is available to the public. Reprinted in facsimile size, it is on sale at the Library's Information Counter in the west front lobby, ground floor, for $2.75. Prepaid mail orders should be sent to the Information Office, Library of Congress, Washington, D.C. 20540.

The *Handbook*, copies of the original edition of which have become increasingly rare in recent years, has proved an invaluable aid in answering questions about the numerous murals, mosaics, statuary, or quotations that decorate the Library of Congress Building. It has been especially helpful both to art history students doing projects on the men who created the Library's decorations and as a guide to many visitors who are descendants of these same artists. Another useful aspect of the book is that it provides descriptions of portions of the building that are now inaccessible to the public because they have been partitioned off as work space.

THREE ARTISTS TO PERFORM IN JANUARY 14 CONCERT

Paula Robison, flute; Gervase de Peyer, clarinet; and Charles Wadsworth, piano, will be the featured performers in a program of instrumental chamber music on Friday evening, January 14, under the auspices of the Library's Gertrude Clarke Whittall Foundation. The three artists, in addition to their individual renowned careers, are among the group of musicians who constitute the permanent members of the Chamber Music Society of Lincoln Center. In this capacity, they are frequently heard in the society's concerts at Alice Tully Hall in New York City and at the Kennedy Center in Washington, D.C. Mr. Wadsworth is the founder and artistic director of the group as well as pianist.

The program will include Sonatine en trio, Op. 85 by Florent Schmitt, Sequenza for solo flute (1958) by Luciano Berio, Sonata in F minor, Op. 120, No. 1 for clarinet and piano by Brahms, Partita in A minor for solo flute by J. S. Bach, Première rapsodie for

clarinet and piano by Debussy, and Tarantelle for flute, clarinet, and piano, Op. 6 by Saint-Saëns.

The concert will begin at 8:30 p.m. in the Coolidge Auditorium. Tickets will be distributed by Patrick Hayes, 1300 G St., N.W., beginning at 8:30 a.m., Monday, January 10. A service charge of 25 cents is placed on each ticket, and only two tickets are distributed to an individual. Telephone reservations may be made on Monday morning by calling 393-4463. Mail orders are not accepted.

The concert will broadcast live and in its entirety by radio station-WETA-FM, and made available to stations in other cities through the Katie and Walter Louchheim Fund in the Library of Congress.

LIBRARY TO REOPEN DISPLAY OF PRESIDENTIAL MANUSCRIPTS

The Library of Congress will reopen its popular exhibition of manuscripts "The Presidents on the Presidency" in conjunction with the inauguration of President-elect Jimmy Carter. The exhibit of letters and papers of 13 early American Presidents reveals their attitudes toward the office of the Presidency. Lithographic and photographic portraits of the Presidents are also displayed.

The exhibit will be on view in the southeast corridors, Ground Floor, Library of Congress Building, from January 17 through January 26. The exhibition halls will be open to visitors on Inauguration Day, January 20, from 8:30 a.m. to 9:30 p.m. Free guided tours will be available from 9 a.m. to 8 p.m.

The manuscripts on display show the concern that Presidents from George Washington to Abraham Lincoln had with the impact of their actions on the office and on the country. George Washington, acutely aware that everything he did established a precedent, wrote to Alexander Hamilton: "It is my wish to act right;—If I err, the head and not the heart, shall, with *justice*, be chargeable."

In a letter to his former secretary, William Short, Thomas Jefferson described the two processes of Presidential decision-making that he used—conferring privately with individual cabinet members and, during major crises, relying on the prevailing sentiments in formal cabinet meetings.

John Tyler, the first president to succeed a predecessor who had died in office, described himself as "the instrument of a new test which is for the first time to be applied to our institutions."

An excerpt from the inaugural address of James K. Polk, who emerged as a dark horse to win the Democratic nomination and election of 1844 at the age of 49, reflects the implacable determination that characterized his conduct in office. One of the strongest chief executives, he exerted influence over Congress and subordinated his cabinet officers to administrative agents. By directing all phases of the Mexican War, he became the first president to actually serve as commander-in-chief.

Also on display is Abraham Lincoln's famous letter in which he justified his suspension of constitutional rights during the Civil War. In an effort to curb draft evasion and cooperation with the South, approximately 13,000 people during the course of the war were arrested and imprisoned under martial law. In this letter, Lincoln defended his action on the desperateness of the emergency, the force of the war power, and the inability of the courts to deal with organized rebellion.

The exhibit represents 13 of the country's first 23 Presidents whose public and private papers rest in the manuscript collections of the Library of Congress. An expanded version of the exhibit was on view at the Library from July through October 1976.

DISTINGUISHED GUESTS OF THE LIBRARY OF CONGRESS

From Abroad

Marie-France Calas, conservateur de Département de la Phonothèque Nationale et de l'Audiovisuel, Bibliothèque Nationale, Paris.

Necmettin Cevheri, National Assembly Deputy for Urfa, Ankara, Turkey.

Ahmed 'ud 'Din Ferez, poet and English literature tutor, Dacca, Bangladesh.

F. Flieder, chief of research, Centre nationale de la recherche scientifique, Paris.

Marlen P. Gapochka, deputy director, and Gleb Kossov, section head, Institute of Scientific Information on Social Sciences, Academy of Sciences of the U.S.S.R., Moscow.

Stephen Hearst, controller, Radio 3, Broadcasting House, British Broadcasting Corporation.

P. H. Kelly, Trinity College, Dublin, Ireland.

Tibor Keszthelyi, attaché for cultural affairs, Embassy of Hungary.

Liljana Kojic-Bogdanovic, cataloger, United States Information Center, Belgrade, Yugoslavia.

Tatyana Kudryavtseva, Pyotr Paliyevskiy, Natalia Trenyova, and Pavel Zagrebelniy, translators and writers from the Soviet Union.

David Lev, economic adviser to the Economic Affairs Committee of the Knesset, accompanied by his wife Sima Lev, Hebrew University, Jerusalem, Israel.

Robert Love, chief programmer, Systems Development Section, National Bibliographic Network, National Library of Australia.

Dugald McArthur, recently retired librarian of the University of St. Andrews, Scotland, accompanied by his wife.

B. Robertson, Embassy of New Zealand.

Dario Ruiz G., National University, Medellín, Colombia.

P. J. Scott, University of Auckland, New Zealand.

Michael Stilkenboom, librarian, German Cultural Institute, Atlanta, Ga., a branch of the Goethe Institute, Munich, Germany.

Oscar Villordo, poet and novelist, Buenos Aires, Argentina.

Cecile Wesley, librarian, Khartoum, Sudan.

J. W. Winings, senior lecturer, School of Computing Science, New South Wales Institute of Technology, Australia.

Habibah Yahya, archivist, National Archives, Malaysia.

From the U.S.A.

Diana B. Cohen, librarian, Stanford, Calif.

Gail Fish, library science student, University of Illinois Department of Library Science.

Harold Olsen, associate librarian, Oberlin College Library, Ohio.

Forty-five students from the Graduate School of Library Service, Rutgers University.

SERIAL RECORD ACQUIRES TERMINAL TO ACCESS COPICS

The Serial Record Division has recently obtained a computer terminal for the purpose of accessing COPICS (Copyright Office Publication and Interactive Cataloging System). COPICS is an on-line system, developed for the Cataloging Division of the Copyright Office, which earlier this year began operations as the accessioning device for that division's periodicals receipts.

As described in an LC *Information Bulletin* article of October 15, (p. 638), the Serial Record Division and Copyright Cataloging Division are exploring methods by which their respective serial activities can be of mutual benefit. The presence of a terminal in the Serial Record Division is another step in providing improved coordination between the division and the Copyright Office.

LIBRARY SCHOOLS INVITED TO PARTICIPATE IN INTERN PROGRAM

All graduate school programs accredited by the American Library Association have been invited to nominate participants in the Library's Intern Program for 1977-78. In a December 9 letter from Librarian of Congress Daniel J. Boorstin, schools were encouraged to nominate up to two of their top students who will be graduating this year.

The Librarian characterized the program as one which "should help the profession train a leadership drawn from the widest possible spectrum of talents. It is especially desirable that we all use this program to draw on the untapped energies and abilities of groups who have not in the past been offered the full opportunity to serve the Nation through professional librarianship."

Descriptive material on the program and on the Library generally has been sent to all ALA-accredited Library schools. The deadline for the receipt of nominations is February 9.

Details of the Intern Program as it applies to current Library of Congress employees were included in an article in the November 26 issue of the LC *Information Bulletin* on p. 719.

JOINT REVIEW OF AACR SET

The Joint Steering Committee (JSC) for Revision of the *Anglo-American Cataloging Rules* (AACR) has decided that the text of the second edition, which is now in an advanced state of preparation, should be reviewed by all the bodies which have contributed to the extensive revision effort. The bodies concerned have agreed to participate in the review, and the final draft of the rules will be circulated to them in January.

This review will take place over a three-month period, and its results will be fully considered by the editors and by the JSC at its final meeting. The review will be concentrated on the comprehensiveness and adequacy with which the principles and policies laid down by and for the JSC have been carried out. It will not be concerned with specific proposals for rule revision already fully considered by the committee.

JOINT REVIEW OF AACR SET

(Continued from p. 803)

In the United States distribution of review copies to bodies other than the members of and representatives to the ALA/RTSD Catalog Code Revision Committee and the Library of Congress will be handled by the American Library Association's Resources and Technical Services Division.

STAFF NEWS

DEATH OF FORMER STAFF MEMBER

Effie M. Wallace, who retired from the Library of Congress in 1971, died Sunday, December 12, at Calvert General Hospital, Prince Frederick, Md., after a heart attack. Mrs. Wallace was 77.

Mrs. Wallace was the widow of Donald K. Wallace, a special investigator for the Department of Commerce, who died in 1932. She was born in Harrison, Minn., and taught school in Lostwood, N.D., before coming to Washington in 1926. She worked in the office of the late Rep. Usher L. Burdick and later in private business before joining the Library staff as a clerk. She worked at the Library for 15 years.

Mrs. Wallace is survived by two sons and two daughters, two sisters and two brothers, 13 grandchildren and two great-grandchildren.

AWARDS

Leroy D. Davis, a science reference librarian in the Science and Technology Division, was presented a 25-year Federal Service award pin on December 16 by F. E. Croxton, director of the Reader Services Department.

A native of St. Petersburg, Fla., Mr. Davis attended Florida A&M College and later Howard University, where he earned a bachelor of science degree in zoology. He has also taken a number of advanced zoology courses at Howard University, where he completed course requirements for a master's degree in English.

He began his Federal career in 1951, serving as an academic instructor with an Army training unit, including a tour in Germany in 1952-53. He came to the Library in November 1953, where he was appointed a deck attendant in the Newspaper Section of the Serials Division.

Mr. Davis was promoted in September 1954 to the Technical Information Division—a predecessor to the Science and Technology Division, where he has served ever since. Beginning as a proofreader, he became a bibliographic assistant in February 1958 and a science bibliographer in September of that same year.

After holding increasingly responsible positions in the Special Bibliographies Section, he was appointed assistant head of the NASA-sponsored Aerospace Medicine and Biology Bibliography Section in August 1967. When NASA terminated its support in June 1969, the section was abolished and Mr. Davis briefly joined the Pesticides Bibliography Section which was also abolished. Mr. Davis assumed his present duties in the Reference Section in December 1969.

Mr. Davis is co-author of volumes 3 through 11 (1960-1965) of the *Aerospace Medicine and Biology* bibliography. He is the principal author of the *Bibliography of the Biological Effects of Magnetic Fields* published in 1962 by the Federation of American Societies for Experimental Biology in the *Federation Proceedings.* He is also the author, in the *LC Science Tracer Bullet* series, of *Sickle Cell Anemia* (1972) and *Diabetes Mellitus* (1975).

Norman Beckman, formerly acting Director of the Congressional Research Service, presented 20-year Federal Service award pins to four CRS staff members.

Frances A. Gulick is an analyst in the Environment and Natural Resources Division. She has served for a number of years in the research and analysis field. She holds a bachelor's degree magna cum laude from Linfield College and master's and Ph. D. degrees from the Fletcher School of Law and Diplomacy. She began her career with the Federal Government in November 1941 when she joined the staff of the Far East Branch of the Office of Strategic Services as a social science analyst. She was employed during the 1940's and 1950's as a research specialist first by the OSS and later by the Department of State, working during the mid-1950's for the White House disarmament staff until its function was transferred to the Department of State.

Upon her husband's transfer to Pakistan in 1958, Mrs. Gulick resigned her position with the Department of State to accompany him. In 1961, after her return to Washington, D.C., Mrs. Gulick was employed as a research specialist by the Agency for International Development and served there until 1965 when she resigned to accompany her husband first to Lagos and then to New Delhi, India. While in India, she was employed by AID as a senior research analyst from 1967 to 1972, serving during part of that period as a population adviser for AID.

Since coming to the Library in September 1973, Mrs. Gulick has been an analyst in environmental

policy in the energy field. Her superior capabilities and qualifications have resulted in three promotions since joining the Library staff.

Ann M. Marley is an analyst in taxation and fiscal policy in the Economics Division of CRS. She has a bachelor's degree in economics from Antioch College and has some graduate training in the field of international relations. Beginning in March of 1949, Mrs. Marley was employed by the U.S. Department of Defense first as a historian in the Armed Forces Agency and then in 1950 as a budget and fiscal administrative officer with the National Security Agency. While in the latter position, she served as the executive secretary of the Research and Development Advisory Council.

In October 1957, Mrs. Marley resigned her position and, until joining the Library in January 1967, devoted her time to her family and household. Employed first by the Library in the Economics Division of CRS as an analyst in public finance, and later as an analyst in taxation and fiscal policy, she received a promotion in January 1968 and a short while later assumed full divisional responsibility for the preparation of the Legislative Status Report. The manner in which she performed her duties led to her receiving an Outstanding Performance Rating in 1969 and again in 1971. Mrs. Marley's knowledge of the field and her superior research capabilities led to her current assignment in 1976.

Marion M. Montague, a U.S. foreign policy analyst in the Foreign Affairs and National Defense Division, holds a bachelor's degree in government from George Washington University, a master's degree from the Fletcher School of Law and Diplomacy as well as a certificate from L'Academie de Droit International in The Hague, Netherlands. She worked as a member of the U.N. Secretariat from 1946 to 1950, as a research analyst and personal assistant to the director of the International Studies Group at the Brookings Institution from 1951 to 1955, and with Phillip C. Jessup at Columbia University in 1955 assisting on a series of lectures given by Mr. Jessup on "parliamentary diplomacy." She served for a brief period in 1956 as an analyst in the Foreign Affairs Division of LRS.

During the period from 1957 to 1967, Miss Montague served in a variety of positions in the Department of State, principally in the Bureau of International Organization Affairs and in the Office of Research and Analysis. During her tenure at the Department of State, Miss Montague also served abroad on the staff of the U.S. Mission to the Organization for Economic Cooperation and Development. While an analyst in the State Department Office of Research and Analysis, she spent two months on an official visit to Indonesia and while with the U.N. spent six months in Korea with the U.S. Temporary Commission for Korea.

Miss Montague became a historian for the Economic Research Service of the U.S. Department of Agriculture in 1967, where she was engaged in writing a history of U.S. foreign agricultural trade from 1800 to 1865 in addition to providing information and research on agricultural trade for use in formulating and evaluating agricultural programs and policies.

Since joining the Library as an analyst in U.S. Foreign Policy in March 1972, Miss Montague has been a specialist in such areas as the law of the sea and U.S. international food and population policy as they relate to U.S. foreign policy. She is a member of several professional organizations and has had published several book reviews and articles. She received a promotion in June 1976 to her present position.

Anibal A. Tinajero, an analyst in national defense in the Foreign Affairs and National Defense Division, has a bachelor's degree from Boston University in aero-mechanical design and structure. He also took a systems effectiveness course with the Bureau of Naval Weapons and a one-year course in science and technology with the Central Intelligence Agency. Mr. Tinajero began his career as a student trainee in aeronautical related research and development for the U.S. Air Force at the Cambridge Research Center. From July 1957 to March 1958 he was an aeronautical engineer with Pan American World Airways, responsible for portions of the structural modifications to the DC-6 and DC-7 aircraft.

In 1958 Mr. Tinajero became an aeronautical research engineer with the U.S. Navy, and in 1961 he became an aerospace engineer with the Bureau of Naval Weapons, where he remained until 1966. Mr. Tinajero then accepted a position as Physical Scientist with the Central Intelligence Agency where he conducted research in the area of aeronautics. While in that position, he was given a quality step increase and a letter of commendation for having contributed to the advancement of technology in these fields.

In January 1974 Mr. Tinajero became a staff member of the House Committee on Armed Services, assisting the committee in obtaining, assessing, and verifying the information upon which legislative authorization for weapons is approved.

Mr. Tinajero joined the Library in March 1975 as an analyst in national defense in the Foreign Affairs Division of CRS. During his tenure at the Library, Mr. Tinajero has proven himself to be a highly competent

analyst with a high level of expertise in the area of national defense.

STAFF ACTIVITIES

Franklin P. Huddle, senior specialist in science and technology, and **Warren R. Johnston**, assistant director for special programs, both in the Congressional Research Service, were publicly cited at a State Department conference on November 17 for their roles as director and associate director of a six-year, 14-study research project on science, technology, and American diplomacy and as co-authors of the concluding study, *Science, Technology, and Diplomacy in the Age of Interdependence.* The occasion was an all-day preparatory meeting of approximately a thousand leaders from both public and private sectors who assembled to help the Department of State formulate plans for U.S. participation in the United Nations Conference on Science and Technology for Development projected for 1979.

ANNOUNCEMENTS

Robert and Marilyn Hiatt are the parents of a son, Jeremy Andrew, born at Holy Cross Hospital on Thursday, December 16. Mr. Hiatt is the assistant to the assistant director (cataloging) of the Processing Department.

Mr. and Mrs. Everette E. Larson are the parents of a boy, Edward Lewis-Eugene, born on November 8 at George Washington University Hospital. Mr. Larson is an area librarian in the Reference Section of the Latin American, Portuguese, and Spanish Division. Mrs. Larson is a serial reference specialist in the Reference Section of the Serial Division.

Correction: The account in the December 17 LC *Information Bulletin* (pp. 776-7) of the presentation of *Histoire de la participation de la France à l'établissement des Etats-Unis d'Amérique* to the U.S. House of Representatives should also have stated that the presentation ceremony was arranged by the House Committee on International Relations. In addition to Congressmen McFall and Brademas, Rep. Clement J. Zablocki, who is a member of the Committee on International Relations, was present. Rep. Zablocki had invited a representative from the Library of Congress to attend the ceremony because the Library had been designated the repository for the gift from the French National Assembly.
